

PVCu vertical sliding sash windows

Traditional windows th

Vertical sliding sash windows offer the character and charm of a traditional sash window with the long term performance of modern production materials.

Our vertical sliding sash windows have excellent thermal properties, so when upgrading your windows you will conserve heat and reduce your heating bills. Superior weathering performance will ensure your new windows retain their pristine appearance year after year. So you can have the best of both worlds; the charm and character of a traditional vertical slider and the benefits of a modern PVCu window, with their low maintenance attributes avoiding the need for costly cleaning chemicals, varnishes and paints.

Choosing our sliding sash windows means you can enhance the look and style of your home without compromising on security or energy efficiency. Hardware is available in chrome, gold and white. Optional sash horns can be added in order to replicate traditional timber frames.

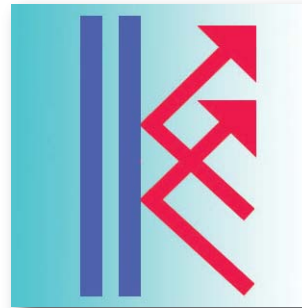

Vertical sliding sash windows bring elegance and style to any home.

at look like the original

Safe and secure with

High energy efficient

Energy efficient Low E double glazed glass units help to keep the heat in and reduce your heating bills and are environmentally friendly.

High strength frames

All frames are fully reinforced with aluminium and sliding sashes are fully reinforced with galvanised steel.

Fully concealed gaskets

There are no black lines visible between the window and the frame due to the unique concealed gasket. This gives the window a clean, traditional look.

Internally beaded

Internally beaded for added security using an attractive authentic sculptured bead between the window and the frame.

Quality

Produced to the highest quality standards, our windows offer a sound investment.

with a beautiful finish

Child safety restrictors as standard

Restricts the opening of the bottom sash to 120mm, includes override facility.

Handles/key operated lock

White as standard, gold and chrome optional. Two locks fitted to windows over 1m wide.

High quality hardware

High quality balance weights and hardware are fixed to integral reinforcements for reliable and smooth opening time after time.

Architraves

Matching architraves for a professional finish.

Assured

Quality, the sliding sash window is the perfect choice for your property.

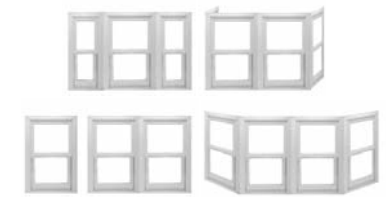

The ins and outs of a vert

High quality sash balances maintain the equilibrium of a sash window at any point of travel and robust locking devices ensure the security of your home

Tilting sash

Built in pivot bar and tilt button allows top and bottom sashes to tilt inwards for easy cleaning and ventilation.

Suitable for large window openings

Single windows can be used for openings up to 1500mm wide x 2500mm high.

For wider openings windows are designed to be linked together.

Minimum size frame 350mm wide x 600mm high.

Available with sash horns

To add character and style to your home.

The window system is simple – two sashes within an outer frame, each working independently from each other. The sashes tilt from the inside to allow for safe and easy cleaning.

Vertical sliding sash window

Glazing bars

To achieve a traditional look without the need for individual units of glass, vertical sliding sash windows offer a choice of internal Georgian or external astragal glazing bars.

Georgian bar

Astragal glazing bar

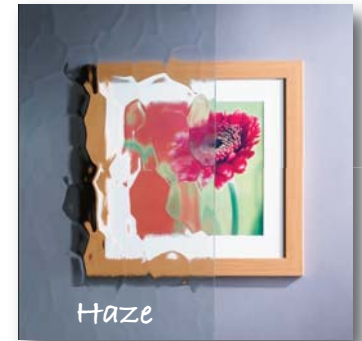

High energy glass

High energy glass is available for improved energy performance and better light transmission

Glazing

Some areas of your home will need to be a little more private than others, for example your bathroom or toilet. So to enhance your privacy, or simply to make a stylish statement, we have a glass to suit.

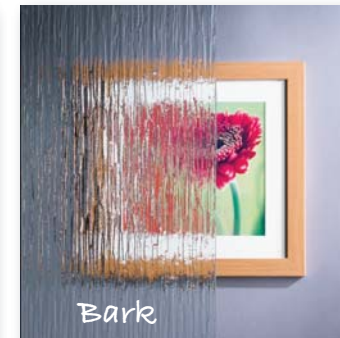

Each of the popular patterns offer a different level of obscurity, providing the privacy you require, whilst maximising the level of daylight passing through the glass.
